

FAIJAN KHAN

Associate Data Scientist · Generative AI · Machine Learning

+91 9589053744 | faijankhan090803@gmail.com | [LinkedIn](#) | [GitHub](#)

OBJECTIVE

Final-year Computer Science student (VIT, CGPA 8.54) with hands-on industry experience in Generative AI, NLP, deep learning, and large-scale data pipelines. Demonstrated ability to design and deploy AI/ML solutions end-to-end, from LLM-powered RAG systems and GAN-based vision models to automated data workflows in production environments. Seeking to contribute as an Associate Data Scientist at Societe Generale GSC by building and optimising AI models, establishing data best practices, and collaborating across teams to translate insights into business value.

EDUCATION

B.Tech in Computer Science & Engineering

Vellore Institute of Technology

CGPA: 8.54

Oct 2022 – May 2026

TECHNICAL SKILLS

Generative AI & NLP	LLM Integration (Groq/Llama 3), LangChain, RAG Pipelines, Prompt Engineering, NLP
Machine Learning	Scikit-learn, XGBoost, Regression, Classification, Clustering, PyTorch, TensorFlow
Deep Learning	CNNs, GANs (Conditional GANs), U-Net, OpenCV, Image Segmentation, CV
Languages	Python, Java, SQL, JavaScript, HTML/CSS
Data Engineering	PySpark, Pandas, NumPy, ETL Pipelines, Data Validation, Apache Tika, FastAPI
Web & Databases	REST APIs, MySQL, MongoDB, Oracle, MS SQL, Azure SQL, Node.js, React (basics)
MLOps & Cloud	Docker, Git, Azure, AWS, Redis, Celery, JIRA, Azure DevOps, Postman
RPA & Automation	UiPath, Python Scripting, SAP Automation

EXPERIENCE

Data & Automation Engineer Intern | Airbus, Bangalore

Feb 2026 – Present

- Designed and maintained PySpark data pipelines to process large-scale enterprise datasets, identifying accuracy and completeness issues before downstream reporting and surfacing KPIs for cross-functional analytics teams.
- Developed automated dashboards converting raw SAP data into structured business metrics; interpreted findings and delivered actionable recommendations, improving decision-making cycle time for operations teams.
- Designed, deployed, and maintained UiPath RPA workflows integrating Python validation scripts, reducing manual processing effort by 60% and ensuring data consistency across interconnected enterprise systems.

Data Science Intern | Sabudh Foundation

Jan 2025 – Jul 2025

- Designed and implemented an end-to-end computer vision pipeline using Python, OpenCV, and PaddleOCR to detect brand advertisements in sports footage, analysing 540+ frames/min at production scale.
- Designed targeted experiments to address edge-case failure modes; retrained the OCR model on a custom dataset, improving precision from baseline to 84.68% and throughput from < 1 FPS to 2.75 FPS via systematic pre-processing optimisation.
- Reviewed existing datasets to identify completeness gaps, established data collection best practices, and provided a detailed findings report with recommendations adopted by the product team.

PROJECTS

NeuralDoc — Hybrid RAG & Document Intelligence Engine | *Python, LangChain, Groq LPU, Llama 3, Docker*

- Built a Retrieval-Augmented Generation (RAG) system integrating Llama 3 via LangChain to enable intelligent document analysis; implemented semantic chunking across PDF data to optimise answer quality and reduce hallucination.
- Designed 'Smart Context' segmentation that splits documents into logical sections (Intro / Body / Conclusion); applied async inference to deliver low-latency summaries at scale — demonstrating applied Generative AI integration into a practical NLP application.

Virtual Try-On System | *Python, PyTorch, Conditional GANs, U-Net*

- Designed and trained a Conditional GAN with U-Net architecture to generate photorealistic garment overlays on user images, applying Thin-Plate Spline (TPS) warping for pose-invariant alignment — utilising deep statistical techniques to improve output realism.
- Designed inference-time experiments to systematically profile and optimise the pipeline, reducing latency by 40%; validated model quality against a manually labelled ground-truth dataset of 1,000+ images.

ACHIEVEMENTS & CERTIFICATIONS

- Top 200 — Amazon ML Challenge (2024); Finalist — HackOn with Amazon (competitive ML track).
- Oracle Certified Generative AI Professional — validating applied knowledge of LLM architectures, prompt engineering, and AI integration patterns.
- Oracle Certified Data Science Professional — covering end-to-end ML workflows, statistical modelling, and production deployment.

LEADERSHIP

Event Lead | EDU4U Club, VIT Bhopal

Sep 2023 – Nov 2024

- Organised and led technical hackathons and ML workshops for 500+ attendees, managing end-to-end logistics and coordinating across competing team timelines — demonstrating communication, teamwork, and project ownership skills.
